Highlights

Easy Installation

Battery-powered, no mains wire required. Quick and easy mounting with screws on the ceiling / wall or place on desk.

Automate your light

You can set the lights to turn on / off or change light mode according to motion detection. It works with all Connected by WiZ products.

Wide range detection

The detection range is as wide as 3 meters with a beam angle of 120 degree.

Whole room control

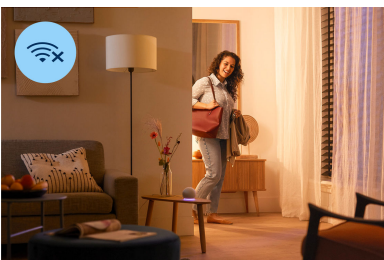

The sensor is attached to a single room and triggers all lights in that room. You can move the sensor in the app if you want it to trigger lights in another room instead.

Flexible setting

Set the lights to turn on a certain brightness or a specific mode such as nightlight, daylight. You can configure what happens when motion is no longer detected, and after how long.

Works even without Wi-Fi

The sensor communicates directly to the WiZ lights. It works even when your Wi-Fi is down.

Trigger different light modes

By setting Rhythms for the room in the WiZ app, you can make your sensor trigger different light modes at different times of the day.
