Material code	Description
SW913705060002	Workspace and Kiosk app

¹ Workspace app distributed via App store and Play store. Kiosk app distributed via Signify software distribution portal

FAQ

1. When was Workspace app and Kiosk app released, and what for?

Workspace app and Kiosk app have been released in 2019/20 as optional premium software service for POE and Interact wireless (PRE) system to support office employees to save time searching an empty desk and thereby increasing employee productivity. Workspace app is a mobile app installed on employee's phone to allow desk reservations. Kiosk app is a windows-based application designed to run on a stationary touch screen for visitors to find an empty desk without personal login.

2. Why phased-out of these applications?

Although employee productivity is an important topic there is a lack of commercial traction for dedicated Signify apps as solution.

3. Can I keep using my Workspace app or Kiosk app?

You can keep using these applications till LDoS (31 December 2025) provided you have a valid subscription. After LDoS the apps are without support and their cloud connection with the POE and Interact wireless installations will be discontinued.

4. Will there be a successor for Workspace app and Kiosk app?

No. There will be no successors or phase-over alternatives.

5. Can a customer use their own workspace / employee application?

Signify provides SDKs and APIs as Software Services to enable customers and 3rd parties to develop their own workspace / employee applications. This includes IPS SDK, Maps SDK, Occupancy API and Control API.
