General note for LEDtube HF T5 HE -600mm

General notes: Refer to the product reference number in the header of the columns to use this product-ballast compatibility list.

Please note that the product is only tested with HF ballast on AC operation. The performance of the product on HF ballasts with DC operation is not tested and is therefore not guaranteed.

The product is designed to work on HF ballasts only. This document is for information purposes only and must be treated as recommendation. Signify will not accept claims for any damage caused by not implementing the recommendations in this document. Signify does not accept any responsibility, warranty or liability when using the product with ballasts not mentioned in this list, or when using successor models of the tested ballasts.

Although Signify aims to provide the most accurate information and test results from controlled experiments the results may vary in dierent applications. This document focuses on the behaviour of above mentioned product. Please also check and follow the instructions of HF ballast manufacturers for installation instructions.

Always check the latest update of the compatibility list on www.philips.com/documentation

General note for LEDtube HF T5 HE - 900mm

General notes: Refer to the product reference number in the header of the columns to use this product-ballast compatibility list.

Please note that the product is only tested with HF ballast on AC operation. The performance of the product on HF ballasts only. This document is for information purposes only and must be treated as recommendation. Signify will not accept claims for any damage caused by not implementing the recommendations in this document. Signify does not accept any responsibility, warranty or liability when using the product with ballasts not mentioned in this list, or when using successor models of the tested ballasts. Although Signify aims to provide the most accurate information and test results from $controlled \ experiments \ the \ results \ may \ vary \ in \ dierent \ applications. \ This \ document \ focuses \ on \ the \ behaviour \ of \ above \ mentioned \ product.$ $Please\ also\ check\ and\ follow\ the\ instructions\ of\ HF\ ballast\ manufacturers\ for\ installation\ instructions.$

Always check the latest update of the compatibility list on $\underline{www.philips.com/documentation}$

Dimming a LEDtube: Please note that the dimming curve of the LEDtube might differ from the curve of a fluorescent lamp

⁽²⁾ Audible noise might be detected when used in silent applications

⁽³⁾ Do not Dim below 10% / Dali step 170

⁽⁴⁾ Do not Dim below 20% / Dali step 185 (5) Set max Dimlevel to Dali step 240

General note for LEDtube HF T5 HE - 1200mm

General notes: Refer to the product reference number in the header of the columns to use this product-ballast compatibility list.

Please note that the product is only tested with HF ballast on AC operation. The performance of the product on HF ballasts with DC operation is not tested and is therefore not guaranteed.

The product is designed to work on HF ballasts only. This document is for information purposes only and must be treated as recommendation. Signify will not accept claims for any damage caused by not implementing the recommendations in this document. Signify does not accept any responsibility, warranty or liability when using the product with ballasts not mentioned in this list, or when using successor models of the tested ballasts.

Although Signify aims to provide the most accurate information and test results from controlled experiments the results may vary in dierent applications. This document focuses on the behaviour of above mentioned product. Please also check and follow the instructions of HF ballast manufacturers for installation instructions.

Always check the latest update of the compatibility list on $\underline{www.philips.com/documentation}$

LEDtube HF T5 HE - 1500mm

Ballast Compatibility List

	Ballast is compatible	This document is for information purposes and must be treated as
*	Ballast is compatible, light output may differ >10% compared to specifications	recommend to lot information purposes and must be netted as recommendation. Philips attempted to provide best results, results are generated in lab controlled environment and may differ from actual application conditions.
**	Ballast is compatible, light output may differ >20% compared to specifications	
	Ballast is not compatible	application conditions.

General note for LEDtube HF T5 HE - 1500mm

General notes: Refer to the product reference number in the header of the columns to use this product-ballast compatibility list.

Please note that the product is only tested with HF ballast on AC operation. The performance of the product on HF ballasts with DC operation is not tested and is therefore not guaranteed.

The product is designed to work on HF ballasts only. This document is for information purposes only and must be treated as recommendation. Signify will not accept claims for any damage caused by not implementing the recommendations in this document. Signify does not accept any responsibility, warranty or liability when using the product with ballasts not mentioned in this list, or when using successor models of the tested ballasts.

Although Signify aims to provide the most accurate information and test results from controlled experiments the results may vary in dierent applications. This document focuses on the behaviour of above mentioned product. Please also check and follow the instructions of HF ballast manufacturers for installation instructions.

Always check the latest update of the compatibility list on $\underline{www.philips.com/documentation}$

General note Philips LEDtube Universal

General notes: Philips LEDtubes Universal T8 are designed to work on HF ballasts, or EM ballast.

For HF ballast connection: Refer to the product reference number in the header of the columns to use this product-ballast compatibility list.

Please note that Philips LEDtubes Universal T8 are only tested with HF ballast on AC operation. The performance of Philips LEDtubes Universal T8 on HF ballasts with DC operation is not tested and is therefore not guaranteed. This document is for information purposes only and must be treated as recommendation. Signify will not accept claims for any damage caused by not implementing the recommendations in this document. Signify does not accept any responsibility, warranty or liability when using Philips LEDtubes with HF ballasts not mentioned in this list, or when using successor models of the tested ballasts. Although Signify aims to provide the most accurate information and test results from controlled experiments the results may vary in different applications. This document focuses on the behaviour of above mentioned Philips LEDtube. Please also check and follow the instructions of HF ballast manufacturers for installation instructions.

Always check the latest update of the compatibility list on www.philips.com/documentation

Dimming a LEDtube: Philips LEDtubes Universal HO are not developed for dimming therefore the performance cannot be guaranteed in a dimming application. In case of usage of a non-dimmable product in a dimmable application, warranty does not apply.

For EM ballasts connection: Please refer to the installation guide printed on package.

General note Philips LEDtube Universal

General notes: Philips LEDtubes Universal T8 are designed to work on HF ballasts, or EM ballast.

For HF ballast connection: Refer to the product reference number in the header of the columns to use this product-ballast compatibility list.

Please note that Philips LEDtubes Universal T8 are only tested with HF ballast on AC operation. The performance of Philips LEDtubes Universal T8 on HF ballasts with DC operation is not tested and is therefore not guaranteed. This document is for information purposes only and must be treated as recommendation. Signify will not accept claims for any damage caused by not implementing the recommendations in this document. Signify does not accept any responsibility, warranty or liability when using Philips LEDtubes with HF ballasts not mentioned in this list, or when using successor models of the tested ballasts. Although Signify aims to provide the most accurate information and test results from controlled experiments the results may vary in different applications. This document focuses on the behaviour of above mentioned Philips LEDtube. Please also check and follow the instructions of HF ballast manufacturers for installation instructions.

Always check the latest update of the compatibility list on www.philips.com/documentation

Dimming a LEDtube: Philips LEDtubes Universal HO are not developed for dimming therefore the performance cannot be guaranteed in a dimming application. In case of usage of a non-dimmable product in a dimmable application, warranty does not apply.

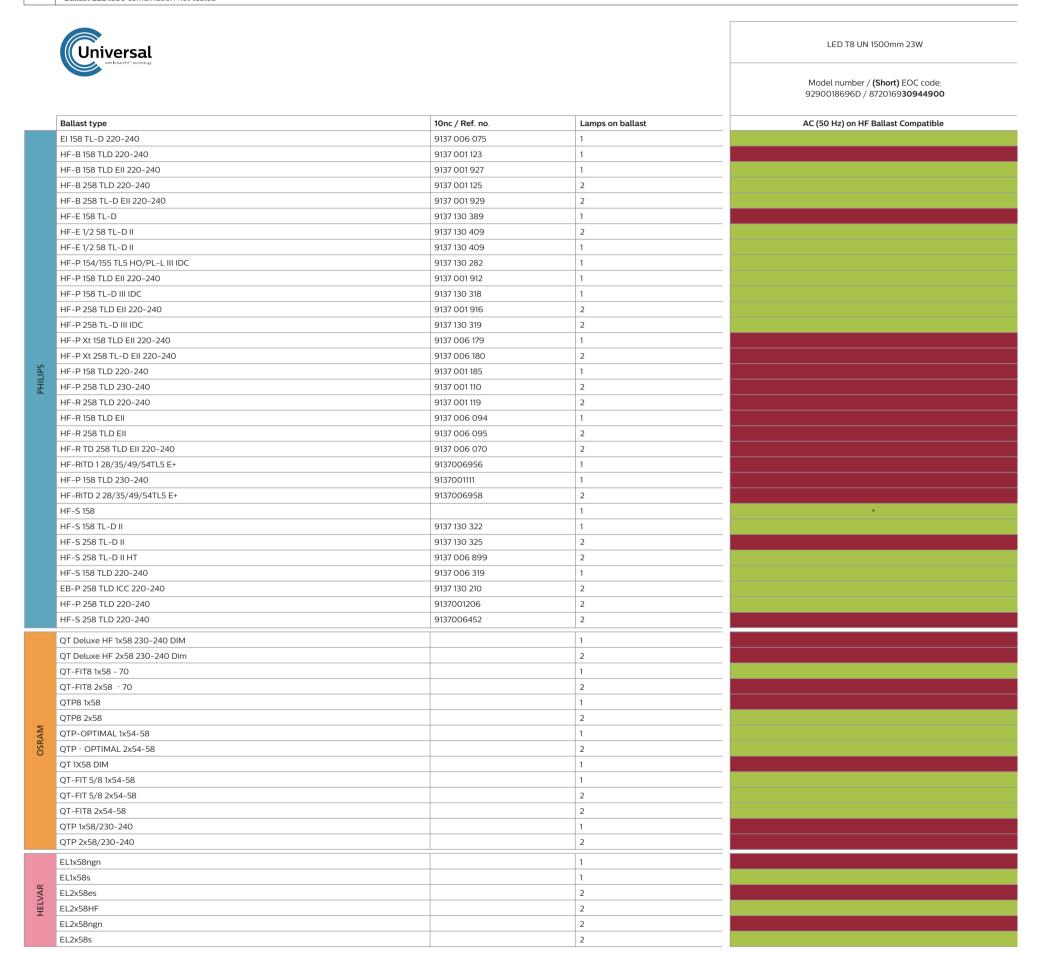

For EM ballasts connection: Please refer to the installation guide printed on package.
