Bosch Spark.NXT

Bengaluru, Karnataka, India

Exclusive system

This project is enhanced with GUI Visualization and Envision Manager as a single tool to control, manage, monitor and maintain the lighting system of the entire building.

Bosch wanted an exclusive system for their campus which enables them to manage and maintain the lighting system of the building.

Largest in India

As the largest campus in India, its unique feature is the control and automation of the lighting.

Signify India, along with its sales and designer teams, has executed this project in-line with the clients requirements, with regular follow ups to ensure everyone is happy with the outcome.

> **Amazing work** by all the teams involved with great co-ordination and **dedication** to executing this project. **Thank you!"**

Mr. Shridhar, Bosch Team
