

# WACA Stadium

Perth, Western Australia

The stadium is home to the Western Australia Cricket Team and WAFL AFL Football teams.

## An upgrade

The WACA Stadium management team wanted to have a complete modern LED sports lighting switchover from a dated MH system using existing infrastructure. The management also wanted DMX-based controls with Pharos controls, linear coloured RGB head frame lighting, and uplighting on the stadium's exit towers.

## Great feedback

The project got some amazing feedback from the client. The stadium is the first in Australia to provide have coloured head frame and towers, creating a wonderful experience for the spectators, the players, and the TV broadcasters.

Amazing work by all key teams involved in this project. Thank you so much for creating such an incredible experience."
