

Cepheus Park

Randers, Denmark

Individual control

Cepheus Park Randers is illuminated by 148 Philips ArenaVision LED gen. 3.5 luminaires and delivers no less than 1200 Lux, meeting UEFA level B guidelines. All light points are controlled via DMX, which allows individual control of each luminaire. The dimming mode is used when the track is used for training or other activities which require less lighting.

Team colors

At the same time, Dansk Sportsbelysning installed RGB lights in all the masts, as well as in front of the facade. The lamps are Vaya Flood HP 150W RGBW from Color Kinetics. Everybody in the village of Randers knows when Randers FC will play home matches in the future, as Cepheus Park will then be illuminated in the team's blue color.
