

Alphadome

Seongnam, South Korea

Ongoing real estate development in Pangyo New Town. Currently, DALI luminaires and a control system has been supplied to the 6-1 and 6-2 districts.

A smart building

Alphadome City's investors wanted the building to be environmentally friendly and smart. Therefore, they installed Signify's modern LED luminaires and sensors in all spaces of Alphadome to maximize energy efficiency, and integrated a Philips Dynalite system to monitor and automatically control all luminaires in the building.

Leed platinum

Alphadome City has obtained LEED Platinum status by using Signify's products and system. Signify Korea and CSI, Inco BPS, have received some amazing feedback from the client.

Signify prides itself on being the **world's leading lighting brand**. We have **high expectations** for the company's extended items, including office lighting. **We're really proud to be a CSI of Signify."**
