

Ayodhya Mandir

Ayodhya, India

Beautification

The project involved the beautification of the famous temples of Ayodhya in India, which are more than 100 years old and carry a significant historical importance.

Installing façade lighting and beautifying these temples uplifted the image of the famous historical mandirs and increased night-time tourism.

Impressive

The Department of Tourism and the Local Municipal Authority are highly impressed by the work.

I want to congratulate everyone involved in the project. The lost heritage of the mandirs has been illuminated once again."

Dg Uttar Pradesh Tourism Mr. Meeshram
