

Novotel & Adagio Hotels

Abidjan, Cote D'ivoire

Future proof

Architect firm, Bits and Atoms, interior designer, Claude Missir Interiors, and consultant, Gilbert Tambourgi, have chosen a GRMS system that provides a unique guest experience and operational efficiency as per Accor standards. All the keypads material and finishing has been matched with the interior design concept to create a seamless feel.

Signify's CSI, Ariss Lumiere SAL, was successful in winning the project against Interel and MesserSchmidt, thanks to strong stakeholder management.

The GRMS system will be integrated into HVAC and PMS systems with all rooms connected to provide maximum efficiency.
