TYPE **SPECIFICATIONS:****CAT #TMO4**

DESCRIPTION: Self adjusting tree strap designed to expand in diameter as the tree grows to prevent damage or restriction to the tree. Stainless steel cable connect 1 to 4 mounting brackets which hold standard accent fixtures. Cables are terminated on a tension controlled spool which slowly releases as the tree grows.

All parts are stainless steel and/or high grade aluminum for durability and extended life

INSTALLATION: To install light fixture onto bracket: Thread provided locknut onto the fixture swivel stem. Install fixture stem into hole in bracket. Thread second locknut provided with fixture onto stem threads on inside of the bracket. When fixture is aimed, tighten outside locknut down onto bracket.

Remove the "cable end" from one of the cables. Wrap bracket assembly around tree. Take up slack in cables by turning the spool adjustment on each bracket clockwise

To install wire base brackets, do the same as above. Insert wire through provided strain relief and push strain relief into hole in bracket.

REQUIRED INFORMATION:

Number of fixtures per strap (1 to 4): _____

Approximate Diameter of tree at mounting position: _____
